Customer Problem Statement Template

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 (Online Shopper)	A busy professional who shops for everyday clothing online, looking for well-fitting basics without spending hours comparing sites.	browse products by category, pick the right size and color, and check out quickly.	many stores only show stock as a single vague number and don't confirm whether my order actually went through.	most sites track inventory at the product level instead of per size/color variant, and don't surface order status after checkout.	hesitant to buy, worried about ending up with the wrong size or a lost order.
PS-2 (Store Administrator)	responsible for managing the product catalog and fulfilling customer orders for the store.	add new products with accurate size/color stock, track incoming orders, and update their status as they're fulfilled.	without a proper admin interface, tracking stock per variant and updating order status means editing the database directly.	most small storefronts lack a dedicated admin panel that ties inventory, orders, and store content (categories, banner) together in one place.	overwhelmed by manual work and worried about mistakes in stock counts or missed orders.
