Empathy Map Canvas

Persona: Sarah Lopez — a 24-year-old graphic designer who shops for everyday clothing online between a busy work schedule, and represents the primary end user of ShopEZ.

What does she THINK AND FEEL? - Wants confidence that the size and color she orders will actually be in stock and fit as expected. - Worries about entering payment and shipping details on sites that feel unpolished or insecure. - Hopes the whole browse-to-checkout experience takes minutes, not an evening, given her limited free time.	What does she HEAR? - Friends complaining about ordering the wrong size because a site only showed “in stock” generally, not per size. - Reviews and word-of-mouth pointing her toward stores with easy tracking and clear return policies. - Colleagues mentioning frustration with cluttered, ad-heavy shopping sites that slow them down.
What does she SEE? - A clean product grid with clear pricing, discount badges, and category filters. - Size and color options on the product page, each showing live stock for that exact combination. - Star ratings and written reviews from other buyers before she decides to purchase.	What does she SAY AND DO? - Filters the catalog by category and searches directly for what she needs. - Selects a size and color, adds the item to her cart, and adjusts quantities before checkout. - Completes checkout with her address and payment method, then checks her order status from her profile.
Pain (Fears, Frustrations, Obstacles) Frustrated by stores where an item shows as available but turns out to be out of stock in her actual size.	Gain (Wants, Needs, Measures of Success) Wants accurate, size-and-color-level stock so she never orders something that isn't actually available.

● Anxious about checkout flows that feel confusing or don't clearly confirm whether the order went through. ● Dislikes having no way to check what happened to an order after placing it, without contacting support.	● Wants to track an order's status — pending, shipped, delivered — without needing to email anyone. ● Success looks like a completed purchase in a few minutes, with full confidence in what she's getting and when it will arrive.
